introducing **UltraZap[®] Med[™]** —————

super absorbent **safety pads**

Paper Pak Industries, with over 45 years of experience in the absorbent industry, now offers Emergency Medical Services paramedics an innovative way to minimize the risk and maintenance of blood and body fluid spills. Constructed with a highly absorbent cellulose core, UltraZapMed super absorbent safety pads are ideal for on-scene, EMS/ER trauma stretchers, and ambulance and helicopter floors.

Our innovative safety pad holds 10 times its weight in fluid and retains all solutions including saline, beta-dine, sterilants, caustic agents, blood and body fluids. UltraZapMed pads ensure the safety and cleanliness of trauma stretchers and ambulance floors.

UltraZapMed super absorbent medical pads offer several unique features and benefits:

- Fluid Contained Within the Highly Absorbent Cellulose Core For Easy Disposal
- Extremely Durable, Wet or Dry
- An Extra Strength Absorbent Transfer Sheet
- A Low-Slip, Water Proof Backing
- Colored Backing Provides Easy Segregation From Other Materials
- Pad Lays Flat On Floor, Allowing Carts To Easily Move Over the Pad
- Available In Rolls or Sheets For Easy, Flexible and Convenient Use
- Pad Easily Trimmed Locally To Conform To Special Needs
- Reduces the Expense and Time of Cleanup

UltraZapMed super absorbent medical pads are also ideal for all high volume medical procedures:

- Arthroscopy
- Cystoscopy
- Craniotomy
- Intestinal Washing/Bowel Resection
- C-Sections/Labor and Delivery
- Cardiac Catherization
- Emergency/Trauma
- Organ Harvesting
