

# quality absorbent products for food marketers from Paper Pak Industries

## ZAP®

- Patented layered high crepe tissue pad
- Strong cellulose tissue traps fluid inside
- Patented sealing process prevents delamination
- Available in a variety of sizes, colors, shapes and absorbencies
- Available in cases or rolls

## ULTRAZAP®

- Patented pouch pad, sealed on all four sides
- Highly creped tissue absorbent core locks in moisture
- No fluff particles to burst out
- Superior performance in case-ready and modified atmosphere applications
- Available in a variety of sizes, colors, shapes and absorbencies
- Available in cases or rolls

## ULTRAZAP® SUPERSORB®

- UltraZap plus FDA approved super absorbent polymers
- Consistent applications of polymers provides superior performance
- High capacity absorbency for high moisture products and family packs
- Available in a variety of sizes, colors, shapes and absorbencies
- Available in cases or rolls

## Custom & Specialty Products

We also offer a range of specialty absorbent products, including **Case Liners** in rolls or cut sheets for retail meat and dairy cases, **UltraZap® Alert™** anti-theft pads with an EAS label embedded inside our patented pouch pad, **Irradiation Safe** pads for specific package applications, and **Biodegradable** pads for environmentally sensitive market channels.

# the right absorbent product for you

Paper Pak Industries' line of absorbent products provide food marketers the flexibility to choose the ideal absorbent solution for your packaging environment. Several key attributes should be considered when selecting the PPI product that solves your absorbent need.

## Structure: Open or Sealed

**Open:** Our Zap layered high crepe tissue pad features four open sides

**Sealed:** Our UltraZap patented pouch pad is sealed on all four sides

## Absorbency

Each of PPI's soaker pads are available in a range of absorbent levels, from as little as 10 grams to as high as 400 grams. For high moisture food products, PPI can apply FDA approved super absorbent polymers to our pads.

## Medium

PPI uses layered high crepe tissue in our best selling pads, thus eliminating the risk of fluff particles unexpectedly bursting into your package. We also offer fluff and airlaid based absorbent products for specific customer applications.

## Sizes and Shapes

Our absorbent pads are available in standard as well as in custom sizes and shapes. PPI's modern finishing lines enable us to manufacture pads in the sizes and shapes that are ideal for your product and package.

## Color

The color of the food pad can be customized for your package. Our most popular colors include white, yellow, pink, blue and black.

## Form

Our absorbent products are available in individual pads packed in convenient cases or in large rolls for high volume mechanical applications.

## Security

PPI's UltraZap pouch pad is available with a Sensormatic® anti-theft device. Concealed between our layered high crepe tissue, the Sensormatic label provides retailers with a cost effective anti-shoplifting device.
